

SUHEL KHAN

Power BI Developer | BI Developer | Power BI Data Analyst

Bangalore, India | +91 7892705294 | suhelkhanpbi@gmail.com | linkedin.com/in/suhelkhan300

PROFESSIONAL SUMMARY:

- Microsoft Certified Power BI Data Analyst (PL-300) with **6+ years** of experience in Power BI development, BI reporting, SQL, DAX, Power Query, data modeling, ETL, and Power BI Service.
- Experienced across the end-to-end Power BI development lifecycle, including requirements gathering, data extraction, transformation, data modeling, dashboard and report development, publishing, scheduled refreshes, security, and stakeholder support.
- Strong experience with Power BI, SQL Server, Oracle SQL, PostgreSQL, SSIS, SSAS, Azure SQL, Azure Synapse, Azure Data Factory, and Azure Analysis Services.
- Experienced in production BI support, troubleshooting Power BI and SQL issues, SSIS job monitoring, data validation and reconciliation, report enhancements, Tableau-to-Power BI migration, and performance optimization.

PROFESSIONAL EXPERIENCE:

Company Name	Designation	Duration
IBM	Application Developer (Data & AI)	Feb 2026 – Present
Neudesic – An IBM Company	Data Analyst	May 2024 – Feb 2026
Wipro Ltd.	Senior Software Engineer (Data & AI)	Sep 2021 – Mar 2024
Wonder Cement	Officer IT	Oct 2020 – Mar 2021
Concentrix	Senior IT Executive	Jun 2019 – Feb 2020

EDUCATION:

Bachelor of Technology (B. Tech): Bijupattnaik University of Technology, 2008 – 2012

CERTIFICATION

Microsoft Certified: Power BI Data Analyst Associate — PL-300

PROJECT DETAILS:

A. IBM (Feb 2026 – Present)

Project: 1 (Kemet Corporation)

Role: Power BI Developer & BI Support Engineer

Duration: Feb 2026 – Till Date

Technologies: Power BI, MS SQL, Oracle SQL, SSIS, SSAS

Responsibilities

- Develop and maintain Power BI reports and dashboards based on business requirements and reporting needs.
- Provide production support for Power BI reports, dashboards, data refreshes, and related BI processes.
- Monitor and troubleshoot SSIS jobs and ETL processes supporting Power BI reports and dashboards.
- Investigate SSIS job failures by analyzing job logs, identifying root causes, and coordinating appropriate corrective actions.
- Troubleshoot Power BI, SQL, and data-related issues by analyzing reports, queries, ETL processes, and underlying data sources.
- Work with MS SQL Server and Oracle SQL to investigate data issues, validate reporting results, and resolve SQL-related problems.
- Support SSAS environments and troubleshoot tabular model and Power BI reporting dependencies.
- Perform data validation and reconciliation between source systems and Power BI reports to ensure accuracy and consistency.
- Implement enhancements, change requests, new reports, dashboards, and reporting solutions while maintaining existing business logic.
- Collaborate with business users and stakeholders to understand requirements, resolve reporting issues, test changes, and support deployment and maintenance.

B. Neudesic an IBM Company (May 2024 – Feb 2026)

Project: 1 (Adani Natural Resource)

Role: Power BI Developer

Duration: May 2024 – Apr 2025

Technologies: Power BI, SQL, Databricks

Responsibilities

- Analyzed business requirements and stakeholder needs to define Power BI reporting requirements and business objectives.
- Collaborated with clients and stakeholders to gather requirements and develop Power BI reports, dashboards, and analytical solutions.

- Developed Power BI dashboards and reports with business logic, customized visualizations, filters, and interactive reporting features.
- Developed **live train tracking and geospatial reporting solutions using ArcGIS for Power BI and Icon Map**, enabling users to visualize train locations, movement, and operational information geographically.
- Developed **interactive land-area mapping solutions** to identify and visualize areas associated with different entities, including government-owned land and plant locations, using geospatial data and Power BI mapping capabilities.
- Created and maintained Dataflows to retrieve data from PI Server and integrate data into Power BI for reporting and analysis.
- Built and validated data models to support accurate reporting, data integrity, and effective report development.
- Published reports to Power BI Service and configured scheduled refreshes to support reliable and timely reporting.
- Implemented Row-Level Security (RLS), performance optimization, and report enhancements based on business requirements.

Project: 2 (SA Global)

Role: Power BI Developer

Duration: June 2025 – Sept 2025

Technologies: Power BI, Postgres SQL

Responsibilities

- Troubleshoot and resolved Power BI report, dashboard, data, and functionality issues based on business and user requirements.
- Analyzed Power BI report logic, data sources, visualizations, filters, and underlying data to identify reporting issues.
- Troubleshoot data-related issues by validating Power BI results against PostgreSQL source data.
- Developed, modified, and validated PostgreSQL SQL queries to support reporting requirements and resolve data discrepancies.
- Performed data validation and reconciliation between Power BI reports and PostgreSQL source data to identify and resolve inconsistencies.
- Investigated incorrect, missing, or unexpected data and performed root-cause analysis while maintaining existing business logic.
- Tested report and query changes, collaborated with stakeholders, and provided ongoing Power BI reporting support.

Project: 3 (**Kraft Heinz**)

Role: **Power BI Developer (Tableau to Power BI Migration)**

Duration: **Oct 2025** – Feb 2026

Technologies: **Power BI, Tableau**

Responsibilities

- Worked on the migration of existing Tableau reports and dashboards to Microsoft Power BI.
- Analyzed Tableau dashboards, reports, visualizations, filters, calculations, and business logic to understand migration requirements.
- Recreated Tableau reports and dashboards in Power BI while maintaining existing business requirements and reporting functionality.
- Converted Tableau visualizations, layouts, filters, and reporting logic into equivalent Power BI solutions.
- Translated existing Tableau calculations and business logic into Power BI and DAX where required.
- Configured Power BI filters, slicers, drill-through functionality, interactions, and other features to replicate the existing Tableau user experience.
- Validated migrated Power BI reports against Tableau reports through data validation, reconciliation, UAT, and regression testing.
- Worked with stakeholders to resolve migration issues, implement required changes, and document migration and validation results.

c. **WIPRO LTD.** (Sept 2021 – Mar 2024)

Project: 1 (Philips Netherlands)

Role: Power BI Developer

Duration: Jan 2022 – Mar 2024

Technologies: Power BI, SQL, Azure Logic App

Responsibilities

- Extracted and integrated data from heterogeneous sources including Azure SQL Data Warehouse, Azure Analysis Services, Excel, and CSV files for Power BI reporting.
- Worked with Azure Data Factory and Azure Data Lake Storage for data ingestion and transformation.
- Used Power Query for data cleansing, transformation, and preparation of data for reporting and analysis.
- Designed and developed data models to support Power BI reporting and analytical requirements.
- Developed complex DAX expressions, calculated columns, calculated tables, and business calculations.
- Worked with Azure Synapse Analytics and Azure Analysis Services for data modelling and analytical workloads.
- Developed interactive Power BI reports and dashboards using business-focused visualizations, including charts, tables, and other reporting components.
- Published reports to Power BI Service and configured scheduled dataset refreshes and On-Premises Data Gateway connectivity.
